

GDS

**GLOBALCOM
DATA SERVICES**

SECURITY INFORMATION AND EVENT MANAGEMENT

**Protect your data with our
SIEM solution**

A background graphic on the left side of the page featuring a network diagram. It consists of numerous white circles of varying sizes connected by thin white lines, set against a dark blue gradient background. The circles represent nodes, and the lines represent connections, creating a complex web-like structure.

SERVICE OVERVIEW

GDS SIEM solution is built on a modern platform: this allows the security team to tackle threat mitigation both effectively and efficiently.

Through machine learning, customers can benefit from GDS SIEM's modular architecture, advanced analysis rules and automation.

GDS offers a variety of services: together with your IT or security team, GDS will work to achieve visibility on your network, and customize the solution based on your environment.

SERVICE FEATURES

SIEM solution is available in two models: through GDS cloud or on premise.

Its flexible design is optimal for all applications and devices.

- Log retention
- Machine learning
- Threat intelligence
- Incident response
- Single dashboard
- Customisation

BENEFITS

- Centralize your security information
- Go beyond log aggregation: Focus on threat detection
- Customize your system for optimal protection
- Real time notifications on critical events and security breaches

MACHINE LEARNING

Detect anomalies on traffic behavior and speed up analysis by enabling machine learning.

Incident response

Benefit from our SOC team who are continuously monitoring and analyzing events

Customisation

Fine tune the solution based on your environment, and customize your own dashboard

Log retention

Collect, store and search your logs based on specific retention policies

DELIVERABLES

- Executive summary: C-level report.
- Dashboard customised according to customer requirements.
- Incident reports – including details of all cases.
- Threat hunting: for detectable threats on customer's network.
- Suggested improvements for security procedures against cyber-attacks.

THREAT INTELLIGENCE

GDS is integrated with different threat intelligence feeds – they enrich the internal database and correlation rules, and they provide a proactive approach to security.

- **Open Threat Exchange (OTX):** powered by the huge data lake of AT&T [the largest telecom company in terms of revenues worldwide]. It delivers more than 19 million potential threats daily, and is used in approximately 140 countries by 80,000 participants.
- **Malware Information Sharing Platform (MISP)** funded by the European Union and fed from multiple sources:

CIRCL

Approximately 800 participants.
Mainly financial private companies.

NATO

Communication and information.

CSSA

Powered by German companies, including Airbus and Deutsche Telekom.

FIRST

- **Virus Total** powered by Google to get updates about zero-day viruses and Threat.
